Barkipedia

Group 3.1's Stage 4
Presentation

AGENDA

01

About Barkipedia

The features, targetted audience, and goals of Barkipedia.

02

The Deliverables

A showcase of our initial hi-fi prototype, heuristic evaluations, and finialized hi-fi system.

03

Video Demo

A video demonstrating the functionality of our final hi-fi system

04

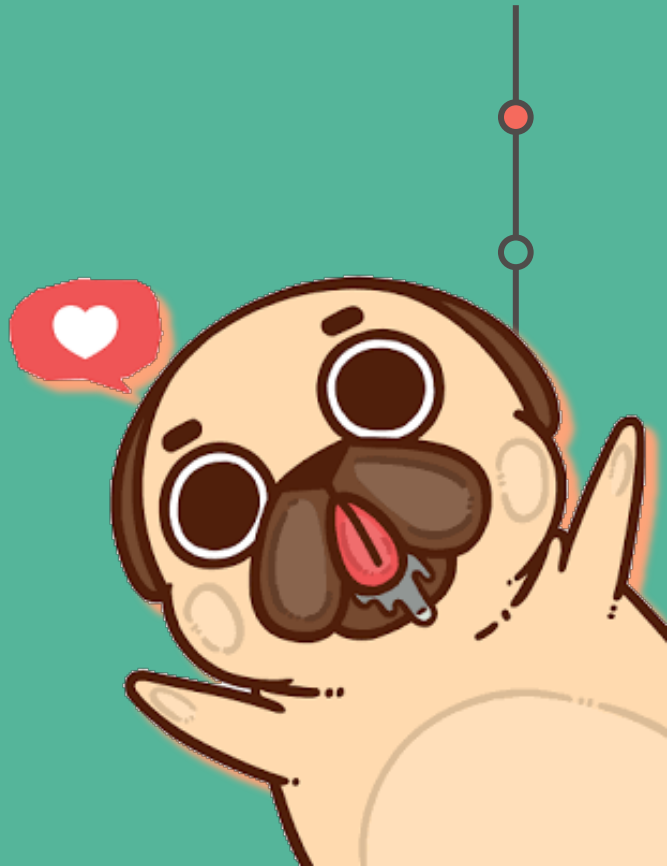
Conclusion

Questions? Concerns? Let us know!

01

The Introduction

Quick reminder of what Barkipedia is all about



ABOUT

- The one stop app for all dog owners, both current and prospective
- Create profiles for you and your dogs
- Discover all dog-friendly events and services in your city
- Community of dog lovers sharing information to help maximize the quality of life for all users' dogs

THE FEATURES

PERSONALIZE

Create a customizable profile for you and your dog! Easily browse through your own forum posts, reviews, and rsvp'd events.

LEARN

Our forum, Bark Overflow, is open to all users from beginner to veteran dog owners! This is where you can get advice, and give advice!

DISCOVER

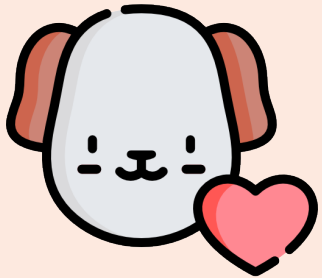
Is your pup in need of a haircut? Do you need to find a trusted vet in your area quickly? Look no further as Barkipedia is here!

EVENTS

Are you and your dog always bored at home? Check out our events page to find one near you to attend with your furry friend.

STAKEHOLDERS

Dog Enthusiasts



New Dog Owners

Veteran Dog Owners

02

The Deliverables

What we created for this stage

- Initial Hi-Fi Prototype
- Heuristic Evaluation Report
- Final Hi-Fi Prototype
- Video Demo

INITIAL HI-FI

In order to complete this prototype, we addressed the following:

Functionality

Made decisions regarding tasks and brought our lo-fi system prototype closer to an existing system.

Realism

Conducted multiple QA trials on our own to gauge functionality and visual design.

Prototype Visual Design

Picked visual elements, selected a bright, vivid colour scheme, and designed the Barkipedia logo.

Usability

Tested usability by checking for technical difficulties, missing elements, responses to user actions, and unclickable buttons.

INITIAL HI-FI

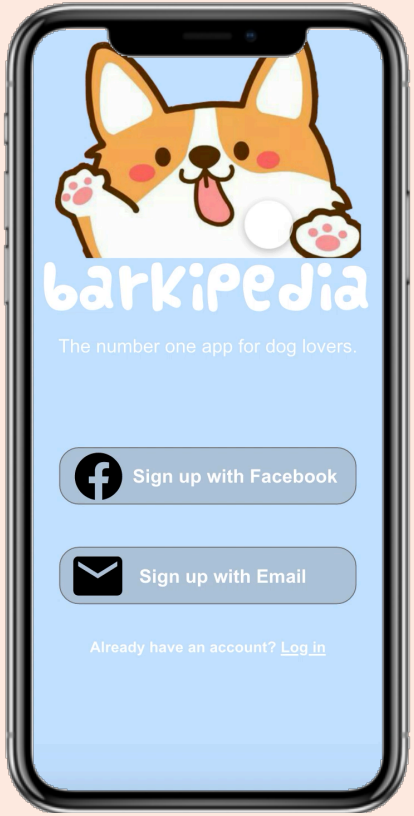
In order to complete this prototype, we addressed the following:

Functionality

Made decisions regarding tasks and brought our lo-fi system prototype closer to an existing system.

Prototype Visual Design

Picked visual elements, selected a bright, vivid colour scheme, and designed the Barkipedia logo.



Realism

Conducted multiple QA trials on our own to gauge functionality and visual design.

Usability

Tested usability by checking for technical difficulties, missing elements, responses to user actions, and unclickable buttons.

HEURISTIC EVALUATION

Easy to tell where you are but highlighting icons at the bottom so the user knows where they are would would be good.

Switching through menus is fast with the icons at the bottom of the screen.

Error prevention was handled effectively through error messages but it was difficult to encounter an error because the app was designed very well, preventing problems and errors.

I would suggest putting icons above the behavior title for clarity on what the icons are there for.

Need to remove back buttons that are non functional or when there is more than one on a page.

HEURISTIC EVALUATION

Reply function in Bark Overflow unclear but other than that, icon functionality easy to determine through appearance.

Easy to navigate Bark Overflow as navigation between each category is at the top.

You should be allowed to not add a dog.

Difficult to read the white text on the light blue background.

Highlights errors effectively and the app itself is so easy to use that errors are rare to come across.

HEURISTIC EVALUATION

IMPORTANT

- Fix formatting of text so it is more legible
- Fix back buttons throughout the app (consistency / remove redundancy / add
- where necessary)
- Delete / Editing / Viewing Dogs
- Edit Profile from profile page instead of settings
- Highlight bottom icon to show what page you are on

LESS IMPORTANT

- Change where mini icons under the subforum pages are placed
- Show post that user is replying to when replying
- Reply button in forums needs to be more intuitive

SUGGESTIONS

- “Help” documentation

FINAL HI-FI

IMPORTANT

- Fix formatting of text so it is more legible
- Fix back buttons throughout the app (consistency / remove redundancy / add
- Highlight bottom icon to show what page you are on
- Delete/Editing /Viewing Dogs
- Edit Profile from Profile Page instead of settings

LESS IMPORTANT

- Change where mini icons under the subforum pages are placed
- Show post that user is replying to when replying
- Reply button in forums needs to be more intuitive

SUGGESTIONS

- “Help” documentation
- Make a simpler less “busy” background

FINAL HI-FI

Heuristic Report Findings

Findings Addressed

03

The Video

Video demonstration of the finalized hi-fi system prototype
